

Outcome Harvesting Principles in Practice

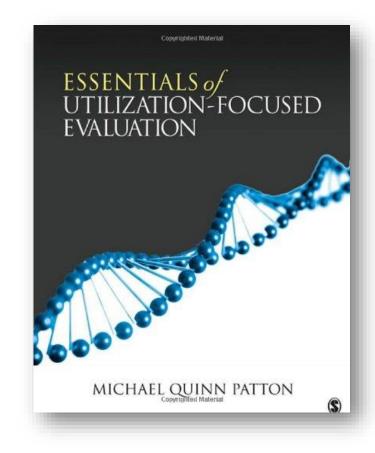

Maastricht, The Netherlands 29 September 2016 Atlanta, Georgia, USA 27 October 2016

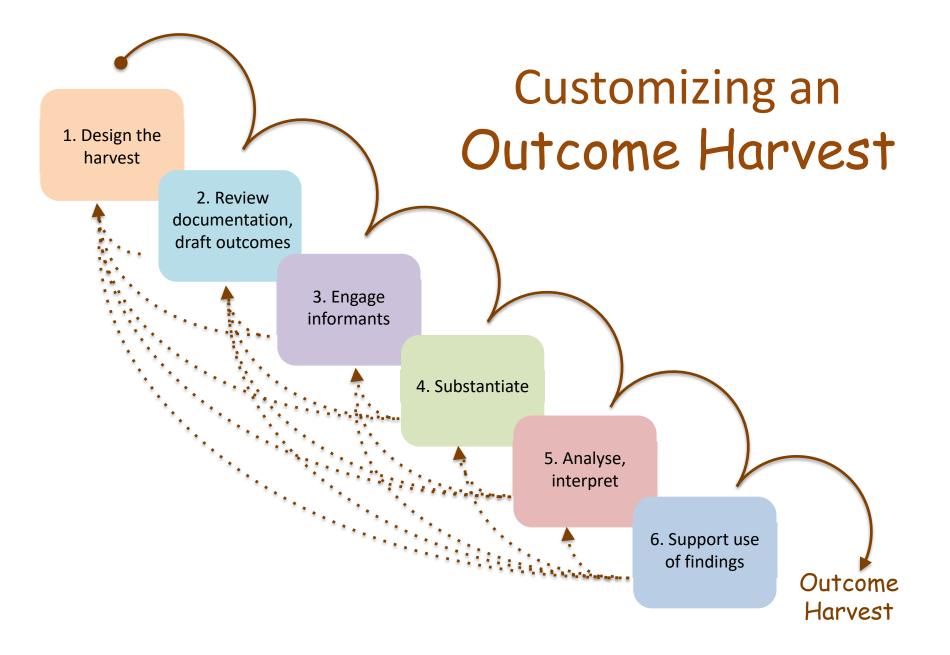

Agenda

- Introduction to outcome harvesting principles in practice, R. Wilson-Grau, Brazil (20 mins)
- Harvesting outcomes from a global network dedicated to improving the life of vulnerable children worldwide, Goele Scheers, Belgium (20 mins)
- Using outcome harvesting in a mixed methods evaluation of the African centre for biodiversity, Barbara Klugman, South Africa (20 mins)
- Questions & answers (30 mins)

The six steps of Outcome Harvesting and the ten underlying Outcome Harvesting principles Inspired by the Outcome Mapping methodology and informed by Utilization-Focused Evaluation.

International social change networks

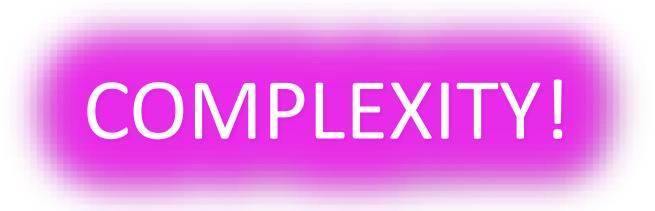

International development funders

Other social change organisations

What did all of these organisations have in common?

At the moment of planning, they faced substantial uncertainty about relations of cause and effect

Track record

Over 400 networks and associations, NGOs, community-based organisations, research institutes, and government agencies in 143 countries on all seven continents.

In 2013, the UNDP selected Outcome Harvesting as one of 11 M&E innovations

Discussion Paper

Innovations in Monitoring & Evaluation Prepared for the and International Conference on National

replaneto for the 30 meetational conservation of a total valuation (apacities, 29 September – 2 October 2023 São Paulo, Brazil 23 August 2023

USAID is currently piloting Outcome Harvesting as one of 5 approaches appropriate for complexity-aware monitoring and evaluation

Discussion Note

Complexity-Aware Monitoring

ng & Evaluation Series

FRSION 2.0 | DECEMBER 2013

USAD bycally uses a specific approach to monitoring referred to as performance monitoring. Performance monitoring uses indicators designed to measure results that contribute to broader country strategy results interworks or project Logframes. Annual (or seni-annual) review of country strategy (CDCS) performance data is intended to inform high-level decision making. At the project and activity level, monitoring is intended to inform inglementation. Performance monitoring practice involves collecting baseline data. and comparing actual figures to targets. (For more information on USADD's approach to performance monitoring, plasse the Automated Directive's System storio 2012.)

Outside the Agency, the term "monitoring" may be used to describe a much broader array of practices with roots in diverse theoretical perspectives. For example, monitoring, for other organizations, does not necessarily involve results, indicators, baselines or targets.

This discussion note outlines general principles and promising approaches for monitoring complex appexts of USAID development assistance. Complexity-aware monitoring is distinct from performance monitoring are practiced in USAID and is intended to complement performance monitoring when used for complex appexts of projects and strategies. Complexity-aware monitoring may be considered monital "monitoring by some working in other organizations or contexts. Nevertheless, consideration of these principles and approaches may strengthen practice.

This publication was produced for review by the United States Agency for International Development. It was repared by Header Brits for Develoch System, inc., under Contractor, Na, ALD-AAA-HI-1100026. The views expressed in this publication do not necessarily reflect the views of the United States Agency for International Development of the United States Covernment.

http://usaidlearninglab.org/library/discussi on-note-complexity-aware-monitoring). The World Bank has published 10 case studies and a toolkit for Bank use of Outcome Harvesting

Outcome-Based Learning Field Guide

Tools to monitor and systematically learn from complex projects to inform implementation Outcome Harvesting use is highlighted as chapters in two books
